Fictional internal control document for software testing only

Control IAM-001 — Privileged access review

The Identity & Access Management team reviews privileged user access annually. Evidence is an approved access review report.

Record retention

IAM-001 retains review records for 3 years in the control evidence repository.

Exception handling

Exceptions found during access reviews are assigned to control owners. The framework does not define a dedicated quarterly risk committee reporting control for privileged access exceptions.

Control owner

Identity & Access Management.

Control status

Active. The stated operating cadence is annual, with operating effectiveness supported by annual evidence.
