Synthetic Evidence Pack — IAM-001

Fictional evidence document for software testing only

Evidence metadata

Evidence item: EVID-IAM-2026-Q4. Control identifier: IAM-001. Evidence date: 30 September 2026.

Evidence summary

A synthetic privileged access review report was completed on 30 September 2026. The report covers 25 privileged identities and records management approval.

Observed cadence

The evidence pack demonstrates an annual review process. It does not demonstrate quarterly reviews during the 2026 period.

Observed retention

The control repository metadata states a 3-year retention period for access review reports.

Exceptions

The report contains no material exceptions for the sampled review. This evidence does not establish a quarterly exception reporting mechanism.

Conclusion

This evidence supports that IAM-001 operated as designed under the bank's older control design, but it does not demonstrate conformity with the synthetic 2026 requirements.
